

GREGORY T MCCUNE DDS INC

BOTOX / XEOMIN POST - TREATMENT INSTRUCTIONS

- No straining, heavy lifting, vigorous exercise for at least 6 hours following treatment as it takes approximately 2 hours to bind to the nerve to start its work. We do not want to increase circulation to that area to circulate Botox® from where it was injected to areas we don't want it.
- Avoid rubbing, massaging, or any manipulation of treated areas for at least 6 hours following treatment. (For the same reasons listed above.) This includes avoiding facials, peels, or micro-dermabrasions after treatment with Botox®.
- It takes 2 -10 days to take full effect. Please contact the office no sooner or later than 2 weeks after treatment if desired effect was not achieved. An enhancement appointment may be necessary.
- Light & Clean Makeup may be applied before leaving the office.
- Following these instructions will minimize the chance of ptosis (drooping eyebrows).
